Joule in SAP Signavio Solutions

Content

1	Overview.	3
2	Joule in SAP Signavio Solutions.	4
3	Integration with SAP Signavio Solutions.	58
3.1	Configure Destination Service and Destinations.	62

1 Overview

Find links to relevant information about Joule's integration with SAP Signavio Process Transformation Suite.

Note

Joule for SAP Signavio Process Transformation Suite is not generally available yet. Please contact your administrator for more information and getting access.

Joule is an AI copilot integrated with SAP's solution portfolio, offering conversational interactions to simplify access to information and automate business processes. This tool is useful to both employees and customers by assisting in task completion, information retrieval, and navigation.

Note

SAP Signavio Process Insights is not part of this integration yet.

Note

If your SAP solution integration with Joule supports conversational search you can enter your query in natural language. Please note that Joule can return responses from SAP content as well as content from its own knowledge base. Only responses that contain links to the source content contain SAP content.

2 Joule in SAP Signavio Solutions

Learn about Joule capabilities available in the SAP Signavio Process Transformation Suite, with the exception of SAP Signavio Process Insights and SAP Signavio Process Governance.

Joule offers three types of capabilities: transactional, navigational, and informational. For more information about these capability types, see [Joule Capabilities](#).

Prerequisites

- To use Joule capabilities in the SAP Signavio Process Transformation Suite and obtain answers to prompts, you must own the relevant access rights and the appropriate licenses for the respective SAP Signavio products. For more information about user management and access rights, see [Where to Manage Users and Access Rights](#).
- To access Joule within the SAP Signavio Process Transformation Suite, an additional entitlement and authorization may be required. Please consult your account executive for more information.
- To use the optional document grounding capability (informational type) and add context to Joule's answers with your own documents, you need first to set up document grounding. For more information about enabling and using this feature, see [Set Up Document Grounding](#).
- Make sure you have reviewed the [Data Protection and Privacy](#) documents for your SAP Signavio product. For SAP Signavio Process Collaboration Hub, see [Data Protection and Privacy](#).

Caution

You should *not* enter any kind of personal or sensitive information in the query. However, if you enter personal data as part of your query, it is sent to a Large Language Model (LLM) to be processed. The LLM does not store the information or use it for training.

Use Cases

The following table lists the Joule capabilities available in SAP Signavio, providing a clear overview of its functionalities to optimize your use. Each entry describes a specific Joule capability. Note that the keywords in double quotation marks in the [Example Prompts](#) column are just examples that you can substitute with the particular artifact keywords you are searching for.

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Page Explainer	Provides instant, AI-generated explanations of an application page. It reduces the need for prior knowledge, helping users navigate and understand the content much better. The Page Explainer capability will process the currently opened site to answer your question. The page might include personal information.  Example: Who is the owner of this process? The author of the process on this page is <i>John Doe</i>, as indicated in the details of the model. If you need further information or assistance, feel free to ask!  Note To use this capability, you need to	Explain Page	Delivers concise AI-generated summaries of each application page. Available wherever Joule is integrated in the header.	Informational	• Whats this page about • Summarize this page • What do you see on this page • Can you explain this page to me • Tell me what this page shows	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
	create a user group in SAP Cloud Identity Services and you need an administrator role in the tenant connected to Joule with SAP Signavio solutions. Follow the procedure mentioned here at the step 8: Integration with SAP Signavio Solutions. ⚠ Restriction The Page Explainer currently processes only textual page content (up to 10KB).					

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Performance Indicator Recommender	Provides recommended process performance indicators and detailed KPIs in answer to queries about how to measure certain areas in the process.	Recommend Measures	Recommends measures, which may include performance indicators from SAP Signavio Process Insights and metrics from SAP Signavio Process Intelligence based on a user's query related to a measure metric or a specific need.	Informational	• What Performance indicators should I track to evaluate the efficiency of my "order-to-cash process"? • Suggest relevant performance indicators to monitor "procurement cycle time" • Which KPI can help measure compliance in the "invoice handling"	Premium

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
					process ?	
Performance Indicator Recommender	Provides recommended process performance indicators and detailed KPIs in answer to queries about how to measure certain areas in the process.	Recommend Metrics	Recommends metrics from SAP Signavio Process Intelligence based on a user's query related to a metric or a specific need.	Informational	- Recommend metrics to track "late deliveries" in my "supply chain". - I want to improve employee onboarding—what metrics should I monitor ? - What are good metrics to evaluate customer complaint resolution speed?	Premium

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Performance Indicator Recommender	Provides recommended process performance indicators and detailed KPIs in answer to queries about how to measure certain areas in the process.	Recommend KPIs	Recommends performance indicators from SAP Signavio Process Insights based on a user's query related to a performance indicator or a specific need.	Informational	Find KPIs for procurement	Premium

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process Recommender	Suggests SAP best practices and customer-specific process models aligned with user needs. Supports both broad, open-ended process improvement questions and specific, detail-oriented queries. Recommendations are either generated from SAP best practices, customer-specific models, KPI catalogs, and SAP Signavio Value Accelerators.	Process Content Recommender	Recommends content from SAP best practices, customer-specific models, KPI catalogs, and SAP Signavio Value Accelerators.	Informational	• How might I optimize my processes? • The procurement process is too slow. How can I make it more efficient? • Our sales cycle takes too long. How can I accelerate it? • The hiring process is taking too long. What strategies can I implement to	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
					streamline it? The performance review process is too slow. How can I optimize it?	

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process Recommender	Provides best practice process recommendation when modeling a new process: it identifies the most suitable process model depending on user needs. Recommendations are either generated from SAP Best Practices, or from the users' own workspaces.	Recommend Customer Processes	Recommends processes from a user's own workspace based on a user's query related to a process or a specific need. Do not trigger that scenario if any other keyword than recommend is used.	Informational	• Do we have a process for handling "IT service tickets"? • Suggest processes from our workspace that match a "sales approval scenario". • What processes exist in our workspace to "support risk management"?	Premium

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process Recommender	Provides best practice process recommendation when modeling a new process: it identifies the most suitable process model depending on user needs. Recommendations are either generated from SAP Best Practices, or from the users' own workspaces.	Recommend SAP Processes	Recommends processes from SAP best practices based on a user's query related to a process or a specific need. Do not trigger that scenario if any other keyword than recommend is used.	Informational	• Recommend best practice process for "onboarding new vendors". • What is the SAP-recommended process for "managing customer returns"? • Suggest a standard process for "handling workforce planning".	Premium

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process Recommender	Provides best practice process recommendation when modeling a new process: it identifies the most suitable process model depending on user needs. Recommendations are either generated from SAP Best Practices, or from the users' own workspaces.	Recommend Processes	Recommends processes based on a user's query related to a process or a specific need. These recommendations may include processes from SAP best practices or the user's own workspace. Do not trigger that scenario if any other keyword than recommend is used.	Informational	• Recommend process both from best practice and my workspace on "order to cash"? • Suggest a process for "procurement"?	Premium

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process Descriptor aka Process to Text	Allows users to obtain clear, human-readable, and easy to understand description of a given process open in the SAP Signavio Process Collaboration Hub. The result can be used to update process descriptions, so that users don't have to manually write the descriptions from scratch.	Describe Process	Provides description of a process model by reading the process model ID from the context. This scenario supports requests like "Describe process model" to explain the process model's key details. If the process model ID is not available, the user is not prompted to provide it.	Informational	• Can you summarize this process model for me? • Describe the purpose and main steps of this process. • What is this process model about? • Help me understand this process so I can share it with stakeholders.	Base

⚠ Restriction

The quality of description might be affected if there are steps with empty labels in the process diagram.

📌 Note

Description language is based on the selected content language. If you want to get a description in

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
	a different language, you can change the content language.					

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process QnA	Allows users to ask questions about any published BPMN process they're interested in, including its attributes, description, and the process diagram itself. You can ask questions about non-BPMN processes. However, there is currently no information available about the actual diagram. 🔗 <i>Example:</i> For journey models, you can only ask for custom attributes. ⚠️ Restriction Be aware that only information from the latest published revision of the process is retrieved (drafts processes are excluded), and that the order of	Process QnA	The user has a question about a process/model, opened process/model or alternatively another process/model using a process/model description or process/model name.	Informational	1. When you are in the SAP Signavio Process Collaboration Hub: • Which parts of the company are involved in the process? • What is this process about? • What task is "roleX" responsible for in the process? • What needs to be done after	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
	items from the diagram cannot be guaranteed. Also, IT systems are not considered in BPMN diagrams. ⚠ Caution Answers to queries can contain personal information, such as authors' names. This information is compliant with SAP Data Protection and Privacy and privacy agreements. 📌 Note Due to a temporary limitation, it is possible that very large responses are trun-				r I complete d "stepX" in the diagram? 2. From elsewhere in the SAP Signavio Process Transformation Suite, the process context must be added: • What is "process X" about? • Who is the process owner of the "process X"? • Which parts of the company	

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
	cated in the output.				are involved in the "process X"?	
Process Comparison Summary	Enables users to quickly understand the key differences between process models by providing an auto-generated, human-readable summary of meaningful changes. Designed to reduce reliance on manual side-by-side visual inspections, it helps process modelers efficiently assess revisions or compare variants without requiring deep technical knowledge.	Compare Processes	Compares an existing process model and a best practice model or compares two different process models.	Informational	- I want to compare this process to the employee onboarding process - Compare the processes employee onboarding DE and employee onboarding AU	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Process Comparison Summary	Enables users to quickly understand the key differences between process models by providing an auto-generated, human-readable summary of meaningful changes. Designed to reduce reliance on manual side-by-side visual inspections, it helps process modelers efficiently assess revisions or compare variants without requiring deep technical knowledge.	Compare Updated Process	Compares process models between the latest published revision and an earlier revision of the same process model.	Informational	• Compare the latest two revisions of the procurement process • Compare the latest two revisions of this process	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Folders	Finds a list of folders, given a folder description.	Navigational	• Where is the "Order to Cash Process Model" diagram in my workspace? • Find the folder for procurement processes. • Show me folders related to onboarding. • Search for the finance documentation folder. • Give me the folder named "2023 audits" •	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Files	Finds a list of files, given a file description	Navigational	• Where is the file named "Purchase Order" in my workspace? • Show me files related to compliance training. • I'm looking for a PDF about onboarding procedures. • Search for presentation slides on Q1 performance.	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find SAP Signavio Process Intelligence Investigations	Finds investigations, given an investigation description.	Navigational	• Show "Order to cash" folder • Can you find the folder entry called "order to cash"? • Look up folder entry called "order to cash"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Journey Models	Finds a list of journey diagrams/journey processes/journey models, given a journey diagram/journey process/journey model description if and only if the user is interested in "journey".	Navigational	• Show "Lead to cash" journey model • Can you find the journey model entry called "Lead to cash"? • Look up journey model entry called "lead to cash"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Cases	Finds a list of cases, given a cases description.	Navigational	• Show "Lead to cash" cases • Can you find the case entry called "Lead to cash"? • Look up case entry called "lead to cash"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Diagrams	Finds a list of process diagrams, given a diagram description .	Navigational	• Show me diagrams for procurement. • Find all onboarding process models. • I'm looking for a process related to invoice handling.	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	View Processes	Finds a list of processes, given a process description and if and only if the user is interested in "Process".	Navigational	• Show "Order to cash" process • Can you find the process entry called "order to cash"? • Look up process entry called "order to cash"	Base
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Navigate by Name	Goes to a process diagram by process name. Treats process IDs and process names as different entities.	Navigational	• Find processes with the name "procurement"	Base
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Navigate to Variant Dimension Screen	Navigates to process dimension definition screen. Process dimensions can be managed here. This function is used when process variant ID is not available. Treats process variant IDs and process variant names as different entities	Navigational	• Go to Variant Dimension Screen	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Dictionary Entries	Finds a list of dictionary/glossary entries/items, given a dictionary/glossary entry/item description.	Navigational	• Locate the glossary term for "SAP ERP" IT systems in the dictionary • Can you find dictionary entries related to the term "Invoice Processing"? • Find glossary items that define procurement terms. • I need a dictionary entry for "purchase requisition".	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Workflows	Finds a list of workflows, given a workflow description.	Navigational	• Show me workflows for employee onboarding. • Find approval workflows related to purchase orders. • I need a workflow that handles IT access requests.	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Reports	Finds a list of reports, given a report description.	Navigational	• I want to find reports . • Show me reports on process model quality . • Find reports about compliance readiness.	Base
Hub Assistant	Finds and navigates to diagrams, dictionary entries, files, folders and Journey models.	Find Tasks	Finds a list of tasks, given a task description.	Navigational	• I want to find tasks. • Show me tasks related to invoice approval. • Find tasks assigned for the onboarding process .	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Create Journey Model	Allows users to create a new journey model.	New Journey	Creates a new journey with the name provided by the user and optional description.	Transactional	• Make a journey called "Customer Feedback" • Create journey model "Onboarding" with description "Customer onboarding" • Can you create a journey model called "Customer Feedback"	Base
Search Journey	Allows users to search and delete journey models.	Delete Journey by ID	Deletes a journey model from SAP Signavio Journey Modeler by its ID.	Transactional	• Delete the journey model "9bc49" • Remove the journey model "9bc49"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Search Journey	Allows users to search and delete journey models.	Delete Entry	Deletes a journey model from SAP Signavio Journey Modeler by its name.	Transactional	• Help me remove the "SalesProcess" journey model • Can you delete the journey model called "SalesProcess" ? • I want to delete the journey model "SalesProcess"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Search Journey	Allows users to search and delete journey models.	Search Journey	Searches for journey models from SAP Signavio Journey Modeler by their title, or name, and display their details.	Navigational	• Search for journey model "CustomerFeedback" • Look up journey model "CustomerFeedback" • Show "SalesProcess" journey model • Can you find the journey model called "SalesProcess" ?	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Create a New Process	This capability enables users to create a new process in SAP Signavio Process Intelligence.	Create New Process	Creates a new process in SAP Signavio Process Intelligence and navigates to the data settings page created.	Transactional	• Create a new process in process intelligence • Please, create a new process in SAP Signavio Process Intelligence for me • New process in process intelligence	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
SAP Signavio Process Intelligence Navigational cases	Allows users to navigate to process list screen, actions, data pipelines, source data and its tables, connections, on-premises extractors.	View on-premises Extractors	Navigates users to Process Intelligence's Process Data Manager extractors section.	Navigational	• Show me extractors in Process Intelligence • List the process intelligence extractors • Show me actions in Process Intelligence • List the actions in process intelligence • Take me to the actions in process intelligence	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
SAP Signavio Process Intelligence Navigational cases	Allows users to navigate to process list screen, actions, data pipelines, source data and its tables, connections, on-premises extractors.	View Actions	Navigates to SAP Signavio Process Intelligence's section of actions view.	Navigational	• Show me actions in Process Intelligence • List the actions in process intelligence • Take me to the actions in process intelligence	Base
SAP Signavio Process Intelligence Navigational cases	Allows users to navigate to process list screen, actions, data pipelines, source data and its tables, connections, on-premises extractors.	View Connections	Navigates users to Process Intelligence's Process Data Manager connections section.	Navigational	• Show me connections in Process Intelligence • List the process intelligence connections • Take me to process intelligence connections	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
SAP Signavio Process Intelligence Navigational cases	Allows users to navigate to process list screen, actions, data pipelines, source data and its tables, connections, on-premises extractors.	View Processes	Navigates to SAP Signavio Process Intelligence's process listing section, where users can see a listing of all the processes.	Navigational	• Show me all process in process intelligence • Take me to processes in process intelligence • Navigate to process in process intelligence	Base
SAP Signavio Process Intelligence Navigational cases	Allows users to navigate to process list screen, actions, data pipelines, source data and its tables, connections, on-premises extractors.	View Source Data	Navigates users to Process Intelligence's Process Data Manager's source data section.	Navigational	• Show me data sources in process intelligence • Navigate to data sources in process intelligence • Take me to source data	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
SAP Signavio Process Intelligence Navigational cases	Allows users to navigate to process list screen, actions, data pipelines, source data and its tables, connections, on-premises extractors.	View Data Pipelines	Navigates users to Process Intelligence's Process Data Manager pipelines section.	Navigational	• Show me data pipelines in process intelligence • Navigate to data pipelines in process intelligence • Take me to data pipelines	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
SAP Signavio Value Accelerators	Allows users to navigate to the Value accelerator library page in SAP Signavio Process Collaboration Hub.	Navigate to Value Accelerator Library	Navigates users to Value accelerator library for SAP Signavio solutions.	Navigational	• Nav to val • Navigate to value accelerator library • Where can I find templates for SAP Signavio processes? • Show me the value accelerators • I want to find something that helps me to accelerate my process transformation	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
SAP Signavio Value Accelerators	Searches for SAP Signavio Value Accelerators in Value accelerator library via filters like industries, types, products, processes, lines of business, value drivers, and more..	Search for SAP Signavio Value Accelerators	Searches for SAP Signavio Value Accelerators in Value accelerator library for SAP Signavio solutions.	Navigational	• I'm looking for accelerators for finance processes • Do you have accelerator content for automotive industry? • I want to filter value accelerators by categories	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Intelligence	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Intelligence.	Informational	• How can I write a Signal Query? • How do I add users to my process in process intelligence? • How do I set up the Process Insights Connect or in Process Intelligence? • Is there a way to manage my data within a source data in process intelligence? • How do I remove	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
					data from a process data pipeline without removing the data from the source data and the connection?	
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Transformation Suite	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Transformation Suite.	Informational	• How can I manage admin access rights? • What products are part of process transformation suite?	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Journey Modeler	Guides users to the SAP Help Portal for further information regarding SAP Signavio Journey Modeler.	Informational	• How to create journey model? • How to get notifications on journey models? • How to link analytics to Journey models?	Base
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Collaboration Hub	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Collaboration Hub.	Informational	• How to manage audiences? • How to manage fact sheet? • How to favorite a particular diagram?	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Explorer	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Explorer.	Informational	• How to get access to process explorer? • How to navigate in process explorer?	Base
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Governance	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Governance.	Informational	• How can I manage tokens in Process Governance? • How can I have SharePo integration with process governance? • How do I manage a workflow?	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Manager	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Manager.	Informational	• How can I use Dictionary? • How can I manage access rights in Variant management? • How can I add custom attributes?	Base
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Process Transformation Manager	Guides users to the SAP Help Portal for further information regarding SAP Signavio Process Transformation Manager.	Informational	• How to use benchmarks in Transformation manager? • How do I link insights to initiatives? • How can I manage insights?	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Conversational Search (document grounding)	Allows users to retrieve necessary information from the SAP Help Portal.	SAP Signavio Value Accelerators	Guides users to the SAP Help Portal for further information regarding SAP Signavio Value Accelerators.	Informational	• How to install value accelerators • How do i search for value accelerators • How can I hide value accelerators from other users?	Base
Variant Manager	Navigates to the Variant Management overview page where you can create, read, update and delete variants and templates of processes.	Info Variant or Template	Indicates whether the specified process is a variant process, template process, or standalone process. Treats process IDs and process names as different entities. Only used when process ID is not available.	Informational	• Is the process "Procure to pay" a variant or a template? • Identify if the process is variant or a template	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	Navigates to the Variant Management overview page where you can create, read, update and delete variants and templates of processes.	Navigate by Name or ID	Goes to a process diagram by process name or process ID.	Navigational	• Take me to an existing process model called "procure to pay" • Navigate to an existing process model called "procure to pay" • Take me to process model with id "9bc49" • Go to process model with id "9bc49"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	Navigates to the Variant Management overview page where you can create, read, update and delete variants and templates of processes.	Navigate Overview	Navigates to Variant Management in Process Collaboration Hub. This function may be used as last option for variant management related requests.	Navigational	- Go to variant management overview - Navigate to variant management center	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	Navigates to the Variant Management overview page where you can create, read, update and delete variants and templates of processes.	Navigate Template Dimension	Navigates to process dimension definition screen. Process dimensions can be managed here. This function can be used both with process variant name or process variant ID.	Navigational	- Go to dimensions of template "Procure to pay" - Navigate to dimensions of template "Procure to pay" - Go to dimensions of template "9bc49" - Navigate to dimensions of template "9bc49"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	Navigates to the Variant Management overview page where you can create, read, update and delete variants and templates of processes.	Navigate Variant Dimension	Navigates to process dimension definition screen. Process dimensions can be managed here. This function can be used both with process variant name or process variant ID.	Navigational	• I want to manage dimensions of the process template called "procure to pay" • Navigate to dimensions of template "procure to pay" • Go to dimensions of variant "9bc49" • Navigate to dimensions of variant "9bc49"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	Navigates to the Variant Management overview page where you can create, read, update and delete variants and templates of processes.	Navigate Variant Group	Navigates to the variant group by name. Variant group contains a template process and one or several variant processes. Treats process template IDs and process template names as different entities.	Navigational	• Go to a variant group called "Procure to pay" • Navigate to variant group "procure to pay"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	This capability enables users to attach a variant to a template, copy a template to create a variant, promote a variant to a template, detach a variant from its variant group, and make any process a template.	Attach variant	Attaches process to a process template (variant group).	Transactional	• Attach the process "Order Fulfillment - Draft" to the template "Standard Order Template" • Link the process "Employee Onboarding Flow" to template "HR Master Template"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	This capability enables users to attach a variant to a template, copy a template to create a variant, promote a variant to a template, detach a variant from its variant group, and make any process a template.	Clone as variant	Creates a copy/clone of a process.	Transactional	• Clone the process "Purchase Request Template" as a new variant called "Purchase Request - Region EU" • Make a copy of the process "Customer Support Workflow" as variant "Support Workflow - Lite"	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	This capability enables users to attach a variant to a template, copy a template to create a variant, promote a variant to a template, detach a variant from its variant group, and make any process a template.	Detach variant	Detaches specific process variant from process template.	Transactional	• Detach the process variant "Expense Approval - Pilot" from template "Expense Approval Template" • Remove the link between variant "Supplier Onboarding Variant A" and its template	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
Variant Manager	This capability enables users to attach a variant to a template, copy a template to create a variant, promote a variant to a template, detach a variant from its variant group, and make any process a template.	Promote variant to template	Uses specified variant process as new template process.	Transactional	• Promote the process variant "Customer Feedback Variant A into a template" • Convert "IT Change Request - Variant EU" into a template	Base
Variant Manager	This capability enables users to attach a variant to a template, copy a template to create a variant, promote a variant to a template, detach a variant from its variant group, and make any process a template.	Set template	Makes specific process as a new template process.	Transactional	• Set the process "Marketing Approval Flow" as a template • Define "Vendor Registration Draft" as a template	Base

Capability	Capability Definition	Skill/Scenario	Skill/Scenario Definition	Skill/Scenario Type	Example Prompts	Base/Premium (Consuming AI Units)
AI-assisted BPMN Simulation Insights	This capability enables users to run and analyze process simulations with Joule.	Run simulation	Turns BPMN simulation data, such as average cost per case or resource utilization, into instant insights and recommendations to enable faster and more informed decisions on process improvements.	Informational	• Run a simulation • Run a simulation for process name "Order process"	Premium

Multi Language Support

Multiple languages are supported in Joule by most SAP Signavio Process Transformation Suite capabilities:

- Arabic
- Bulgarian
- Chinese (CN)
- Chinese (TW)
- Croatian
- Czech
- Danish
- Dutch
- English
- English (GB)
- Estonian
- Finnish
- French
- French (CA)
- German
- German (CH)
- Greek
- Hebrew
- Hindi
- Hungarian
- Indonesian
- Italian

- Japanese
- Kazakh
- Korean
- Latvian
- Lithuanian
- Macedonian
- Malay
- Montenegrin
- Norwegian
- Polish
- Portuguese
- Portuguese (PT)
- Romanian
- Russian
- Serbian
- Slovak
- Slovenian
- Spanish
- Swedish
- Thai
- Turkish
- Ukrainian
- Vietnamese
- Welsh

User language is used for UI elements, and content language is used for content, such as diagrams, files, folder titles, and descriptions. User language can be changed in the user's profile page or in the SAP Signavio Process Manager settings menu. Content language is changed under the user's dropdown menu, after selecting the avatar in the header. For more information, see [Joule Multi Language Support](#).

3 Integration with SAP Signavio Solutions

Steps required to integrate Joule with SAP Signavio Solutions.

SAP Signavio Process Transformation Suite helps you understand, improve, and transform your business processes – fast and at scale – with a cloud-based process management platform.

Integrating SAP's digital assistant *Joule with SAP Signavio Solutions* lets users interact with SAP Signavio content via conversational patterns (informational, navigational, and transactional).

With this setup, you can launch Joule from SAP Signavio and use SAP Signavio scenarios through the same SAP Cloud Identity (SCI) and Identity Authentication Service (IAS) used by the SAP landscape.

ⓘ Note

Joule is currently not available for SAP Signavio Process Insights and SAP Signavio Process Governance.

Prerequisites

- You have a Signavio tenant (at least SAP Signavio Process Manager with Enterprise Plus or SAP Signavio Process Modeler license).

⚠ Caution

You can only connect one SAP Cloud application to a Joule instance. Therefore, two or more SAP Signavio solutions tenants can't be connected to the same Joule tenant.

- You have met the Joule-specific prerequisites. For more information, see [Prerequisites](#).
- You have an SAP Business Technology Platform (SAP BTP) subaccount for the relevant region (EU10, EU11, US10, AP10, JP10, or AP11) and access to the associated SCI.

ⓘ Note

The same SCI must be used across Joule and SAP Signavio solutions.

- You have admin access to SAP Signavio solutions, BTP, and IAS for performing the setup.
- You have reviewed the following items to get an overview of the initial setup procedure, onboarding, data protection, privacy, and security-relevant information that applies to Joule:
 - [Initial Setup](#)
 - [Joule Onboarding Guide](#)
 - [Customer Data Protection in AI Features](#)
 - [Security](#)
 - [Data Protection and Privacy](#)

Integration Steps

Obtain Joule Entitlement

To integrate Joule with SAP Signavio solutions, both customers and partners must get the Joule Base Stock Keeping Unit (SKU) 8019544 either directly from [SAP Store](#) or from their account executives.

You can reach out to your Account Executive (AE) or Customer Success Partner (CSP) for assistance to create a Joule Base SKU contract for you with the entitlement that is to be attached to the BTP account.

Configure SAP Cloud Identity Service

⚠ Restriction

All workspaces created after Nov 25, 2025 have Single Sign-On (SSO) activated automatically with SAP Cloud Identity Service as the identity provider. For these workspaces, we strongly advise not to change the SSO configuration as described in this section to avoid unwanted effects. For more information, see [Harmonization of Authentication and Identity Management](#).

For SAP Signavio workspaces created before Nov 25, 2025, follow these steps:

1. Set up SSO using Security Assertion Markup Language (SAML). The generic procedure is described in the sections *Configure your identity provider (IdP)* and *Enable SSO using SAML* in the [Single Sign-on Using SAML](#) page of the *User Management, Authentication, and Authorization* guide.

For more information, see [SAP Single Sign-On](#).

📘 Note

SAML is a standard to exchange authentication and authorization data between a service provider (SP) and an identity provider (IdP). SAP Signavio acts as an SP and agrees to trust an IdP to authenticate users. For the configuration, the SP and the IdP must exchange metadata files.

2. Configure the SAP Cloud Identity Services and Identity Authentication service for SAP Signavio Process Transformation Suite as identity provider.
Follow the procedure described in the section *Configure your IdP* on the [Single Sign-on Using SAML](#) section of the *User Management, Authentication, and Authorization* guide with *Identity Authentication* as *IdP*.

📘 Note

Integrating SAP Signavio with Identity Authentication is necessary because Joule leverages the Identity Authentication service of the integrated SAP product for user login. For more information, see [Configure Trust to the Identity Authentication Tenant](#).

3. In the SAP Cloud Identity Services, navigate to [Applications & Resources](#) > [Applications](#) > [Create](#). Enter the following parameters in the *Create Application* window:

Display Name:	<defined by customer>
Type:	SAP Signavio solution
Parent application:	None
Protocol Type	SAML 2.0

- In the [Single Sign On](#) section of the created application, under [SAML 2.0 Configuration](#), upload the metadata file from the SAP Signavio workspace (downloaded in Step 3 of *Configure your IdP* on the [Single Sign-on Using SAML](#) page) and select [Save](#).
- To configure the IdP, you also need to set the [SAP Global User ID](#) as the [Name ID](#) in the [IdP/SAML configuration](#). This allows the configuration of a unique and immutable identifier as [Name ID](#). [Subject Name Identifier](#) must be configured for SAP Signavio with these parameters:

Primary Attribute	
Source	Identity Directory
Value	Global User ID

- In SAP Cloud Identity Services, configure user attributes for Joule from the identity directory.
In the [Single Sign-On window](#) [Attributes tab](#), ensure that the values indicated for the [Self-Defined attributes](#) match these ones:

Name	Source	Value
email	Identity Directory	Email

For more information, see [Configure User Attributes for Joule from the Identity Directory](#).

Note

You must log in to your SAP Signavio workspace at least once before using Joule. This ensures that SAP Signavio has received the Global User ID from the Identity Authentication service and is able to identify the user.

- In the SAP BTP cockpit, configure the destinations for using the navigation service in your SAP BTP subaccount. For more information, see [Configure Destination Service and Destinations \[page 62\]](#).
- In the SAP BTP cockpit, run the Joule booster:
On the [Select Integrations](#) screen, select [SAP Signavio](#) as the SAP Solution. You can select other products in combination with the SAP Signavio Process Transformation Suite if you have appropriate licenses and entitlements. For more information, see [Run the Joule Booster](#).

Tip

Check that the Joule integration completed successfully. Log in to SAP Signavio Process Collaboration Hub and look for the Joule icon (usually in the top/right area). Select the icon and test a simple prompt.

SAP Cloud Identity Service Additional Configurations

Some Joule skills require that you create a user group in SAP Cloud Identity Services and you need an administrator role in the tenant connected to Joule with SAP Signavio solutions. Follow this procedure:

- In SAP Cloud Identity Services, go to [Users & Authorizations](#) [Groups](#).
- Create a group and enter `grp_joule_skills_personal_data_restricted` in the [Name](#) field. You may enter the name of your choice in the [Display Name](#) field.

Note

- To provide your end users visibility and access to base Joule capabilities, you must also create another group titled `sap.sig.base` as explained above and add users to it.

- To provide Joule users visibility and access to premium features as well, you must use the group `sap.sig.premium`.

- Optional: Search for [Joule](#) application to be attached to this group and give read/write access in the [Supported Operations](#) field.
- Add users to the group.
For more information about how to create a user group, see [Create a Group](#).

Note

Personally Identifiable Information (PII) may be processed for those skills, but it is not stored.

Base and Premium Capabilities for Joule with SAP Signavio Solutions

Depending on the licenses that you hold or permissions that you have, you may have access to Base Joule capabilities. The prerequisite for Premium Joule capabilities is the ownership of AI units. You can check if the feature you would like to activate is listed as Premium or Base on this page: [Joule in SAP Signavio Solutions \[page 4\]](#).

- Base Joule capabilities: Base Joule offerings include Joule Base capabilities that offer navigational, informational, and transactional capabilities, as well as offerings that are already licensed as part of your SAP Signavio solutions. No AI units are required to activate or use Base AI offerings.
- Premium Joule capabilities: Premium Joule offerings are advanced AI offerings that are paid for with AI units, for example Joule Premium capabilities including some transactional and analytical skills. No additional approval of the SAP AI Terms is required, but you have to create a ticket with the support component BPI-SIG-CA-AI in [SAP for Me](#). For more information about how to buy and activate Premium AI capabilities, see [SAP Business AI Catalog](#)  and [SAP Business AI Estimator](#) .

Set Up Document Grounding (Optional)

To use the document grounding capability (informational type) and add context to Joule's answers with your own documents, you can set up document grounding. For more information, see [Set Up Document Grounding](#).

Troubleshooting

Symptom	Possible Cause	Action
Joule shows blank screen	User is not authenticated properly via IAS	Make sure you use the right URL for logging into your SAP Signavio account. The right URL will navigate you to login via IAS.

Symptom	Possible Cause	Action
	Browser compatibility check	Joule uses an iframe and also requires access to cookies in browser. Please allow third party cookies for Chrome browser. If you are using Safari, you must disable Prevent Cross Site Tracking under the Privacy settings of your browser. For more information, see Supported Browsers .
	IAS domain mismatch (e.g. ondemand.com vs cloud.sap), SAP Signavio solutions URL not trusted in BTP	Check trusted domains in BTP and IAS, re-download metadata with correct domain.
Joule icon not visible in SAP Signavio solutions	SAP Signavio solutions not added to formation, or formation still "Synchronizing"	Go to BTP Formations Check Status Re-include Signavio
User can log in to SAP Signavio solutions but Joule fails	Different IAS used for Joule and SAP Signavio solutions	Make sure the same IAS is used all across.
SSO fails after setup	Metadata is out of sync	Re-download SP metadata from SAP Signavio and re-upload to IAS.

3.1 Configure Destination Service and Destinations

Steps to configure the destinations for using the navigation service.

→ Remember

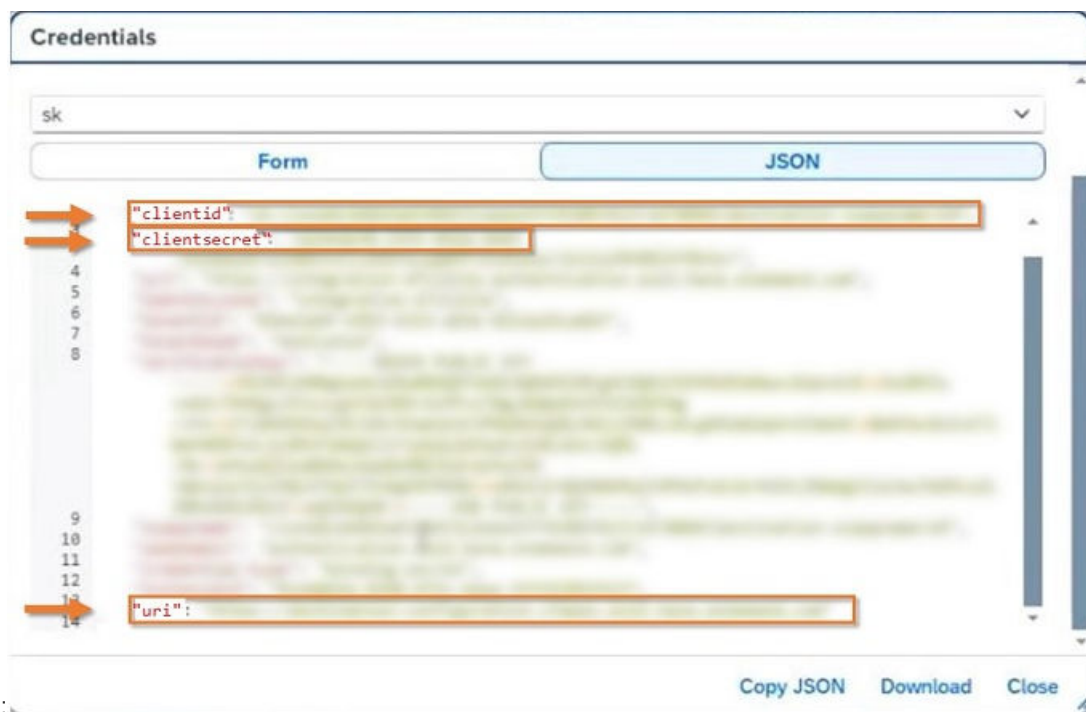

Configuring destination service and destinations is currently a mandatory step. However, once Joule migrates to work zone, these steps won't be required and you'll simply need to run the Joule booster again. For more information about running the booster, see [Integration with SAP Signavio Solutions \[page 58\]](#).

In your SAP BTP subaccount provisioned for Joule, you need to configure destinations **SIGNAVIO_WZ_CONFIG** and **SIGNAVIO_WZ_RUNTIME** to use the navigation service.

Procedure

1. Open the [SAP BTP Cockpit](#).
2. Find the [Destination Service](#) in the [Service Marketplace](#).
3. Select [Create](#).
4. Select the lite plan and choose an instance name in the [New Instance or Subscription](#) window.
5. Create a new service binding with the name of your choice in [INTEGRATION - Instances and Subscriptions](#) [Instances](#) [Joule-Signavio-DS](#).

6. Select the newly created service binding.
7. Navigate to the [JSON](#) tab.
Find and copy the values between quotation marks for the *clientid*, *clientsecret*, and *uri*

keys:

8. On the left pane, navigate to ► [Connectivity](#) ► [Destination](#) and create the new **SIGNAVIO_WZ_CONFIG** destination with the following information:

Field	Value
Name	SIGNAVIO_WZ_CONFIG
Type	HTTP
Description	Destination Service Configuration
URL	URL from the service key created for the service instance of SAP Signavio (paste the address you copied step in 7, then add the suffix <code>/destination-configuration/v1/destinations/</code>).
Proxy Type	Internet
Authentication	OAuth2UserTokenExchange
Client ID	Client ID from the service key created for the service instance of SAP Signavio (located in the JSON file, see step 7)

Field	Value
Client Secret	Client Secret from the service key created for the service instance of SAP Signavio (located in the JSON file, see step 7)
Token Service URL Type	Dedicated
Token Service URL	Enter the URL to the OAuth2 token service in the following format: https://<my-subdomain>.authentication.<region>.hana.ondemand.com/oauth/token

9. In the *Additional Properties* section, verify that the checkbox *Use default JDK trust store* is selected.
10. Create another new destination **SIGNAVIO_WZ_RUNTIME**, with the following information:

Field	Value
Name	SIGNAVIO_WZ_RUNTIME
Type	HTTP
Description	Signavio WZ Runtime URL
URL	Base URL of your Signavio client from your Signavio workspace, example: https://editor.signavio.com
Proxy Type	Internet
Authentication	NoAuthentication

11. Like in the previously configured destination, verify that the checkbox *Use default JDK trust store* is selected in the *Additional Properties* section.
