Learn how SAP prioritizes data privacy and security in AI capabilities across different SAP Signavio products and services.

1.1 AI Capabilities Available in SAP Signavio

Learn about the entire catalog of AI capabilities in SAP Signavio.

The workspace administrators need to activate these AI capabilities in order to provide access to users. To learn how admins can activate and manage user access for AI capabilities, see [Activating Embedded AI Capabilities and Assigning Users](#).

Capabilities	Description	Type of Capability
AI-assisted process recommender	Recommends process models from your workspace or a pre-configured database of 5000 best practices. For more information, see AI-Assisted Process Recommender .	Premium AI
AI-assisted performance indicators recommender	Provides quick recommendations on process performance indicators (PPIs) that are relevant to your business process and problems. For more information, see AI-Assisted Performance Indicators Recommender .	Premium AI
AI-assisted process modeler, text to process	Creates a BPMN diagram from a text description of a business process. For more information, see Creating a BPMN Diagram Using Text Input .	Premium AI

Capabilities	Description	Type of Capability
Joule with SAP Signavio solutions	Provides users with an intuitive and efficient way to navigate through process diagrams, dictionary items, documents, and more using natural language keyword search. It helps you to identify the most relevant metrics to measure the success of a process with best practice KPI recommenders, ensure data-driven decisions and process improvements, and reduce the time and effort that is required to access and often times, even implement the right information. For more information about all the capabilities available in Joule, see Joule in SAP Signavio Solutions. For more information on how to integrate Joule, see Integration with SAP Signavio Solutions.	Base AI
AI-assisted process analyzer, text to insights	Enables you to ask questions in natural language and receive immediate insights to inform business decisions. For more information, see Text to Insights.	Base AI
AI-assisted process analyzer, text to widget	Generates dashboard widgets using the natural language prompts that you provide. You can then create data visualizations without specialist knowledge. For more information, see Text to Widget.	Base AI
AI-assisted insights description generator	Helps you to capture and share insights more effectively with AI-generated descriptions that are clear, consistent, and business-friendly. For more information, see Creating Insights in Investigations, Dashboards, and Widgets.	Base AI
AI-assisted transformation advisory, initiative builder	Enables you to upload business documents like strategic reports, operational reviews, or financial statements and transforms them into initiatives with detailed recommendations for improvements. For more information, see Creating Initiatives Automatically using AI.	Base AI

Capabilities	Description	Type of Capability
AI-assisted content search	A semantic search engine that understands and interprets the context and meaning behind your search terms, accommodating your terminology to deliver more accurate results. Note This AI-assisted capability is available in SAP Signavio Process Insights only. For more information, see Searching for Content in the <i>User Guide for SAP Signavio Process Insights</i>.	Base AI

[AI Units Purchase and Consumption \[page 5\]](#)

1.2 AI Units Purchase and Consumption

This topic offers an overview of acquiring and using AI units to enhance visibility and control over your AI unit usage.

AI Units

An AI unit is a virtual currency that allows customers to consume Premium AI capabilities. Each Premium AI capability will consume SAP AI units according to a predefined value metric (per process, per transaction, per page, and so on). For more information, see [AI Units](#).

How to Purchase AI Units

To obtain a quote for AI units, please reach out to your Account Executive (AE) or Customer Success Partner (CSP). You can use the [AI Estimator](#) to assist you in calculating the number of units you may need for the AI capabilities you're interested in.

How to Monitor AI Units Consumption

In [SAP for Me](#) you can review detailed information about your consumption of AI units, which includes:

- Your current balance of AI units.
- A summary detailing the consumption of AI units by each Premium AI feature.
- The number of AI units approaching their expiration date.

1.3 Customer Data Protection in AI Capabilities

Learn how SAP prioritizes data privacy and security in AI capabilities across different SAP Signavio products and services.

At SAP, we prioritize data privacy and security as we release new AI capabilities. Users of AI features are informed about the fact that they interact with an AI through a notice within the user interface of the AI feature. Users are advised to verify the output of AI features before relying on it.

For further information about the processing of your personal data (your name, email address and the respective log of your acceptance), please have a look at the [SAP Privacy Statement](#). If you want to exercise your data subject rights as described under the section **What are your data protection rights and how can you exercise them?**, please contact privacy@sap.com.

To get more information about how customer data is stored and protected for AI features, check out the following table:

Product / Feature	Data protection information for AI features
SAP Signavio Process Collaboration Hub	Protecting Customer Data in AI
SAP Signavio Process Manager	Data Protection and Privacy
SAP Signavio Process Intelligence	Protecting Customer Data in AI
SAP Signavio Process Transformation Manager	Protecting Customer Data in AI
Joule with SAP Signavio solutions	Data Protection and Privacy

Note

Using AI features may involve international transfers of customer data. To view a list of all available data centers used by SAP's generative AI models, see SAP Note [3437766](#). To get more information about data transfer in individual SAP Signavio products, refer to the respective product help documentation as specified in the table.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
