- 1.1 Activating Embedded AI Capabilities and Assigning Users. 3
- 2 Provisioning for SAP Signavio Process Governance Suite Tasks. 7**

1 Artificial Intelligence (AI)

SAP Signavio uses Artificial Intelligence (AI) to enhance business process management and optimization. These AI capabilities are integrated within SAP Signavio's suite, empowering you to make data-driven decisions and fostering continuous process refinement.

[Activating Embedded AI Capabilities and Assigning Users \[page 3\]](#)

Find out how to activate AI capabilities in your workspace and assign users.

1.1 Activating Embedded AI Capabilities and Assigning Users

Find out how to activate AI capabilities in your workspace and assign users.

Note

Using AI capabilities involves customer data. To understand how the customer data is used and protected, see [Customer Data Protection in AI Capabilities](#).

Note

The information outlined here doesn't apply to AI-assisted capabilities available in SAP Signavio Process Insights. For more information about how to consent to SAP AI Terms and activate AI-assisted capabilities in SAP Signavio Process Insights, see [AI Settings](#) in the *Administration Guide for SAP Signavio Process Insights*.

1.1.1 Base AI Capabilities

Base AI capabilities are included at no additional cost in product licenses.

Context

To be able to use base AI capabilities, you must first accept the AI terms and conditions. Follow these instructions to activate them:

Procedure

1. At the bottom of the left-side panel, go to  ([Settings](#)).
2. In the left-side panel, under [System Settings](#), select [AI Services](#), and select [View terms](#) to review and accept the terms.
3. Save your changes.

Results

Once you accept the terms, you can access the feature management section and manage user permissions at individual feature level. For more information, see [Managing Access to AI Capabilities \[page 5\]](#).

1.1.2 Premium AI Capabilities

Using premium AI capabilities results in an additional cost, charged in AI Units. They require specific steps for activation beyond standard licensing. Follow these instructions to activate them.

Prerequisites

For premium AI capabilities, the SAP AI terms and conditions are signed during the purchase of AI Units. No further action from you is needed in this regard.

Procedure

1. Estimate the amount of AI units you will need using the [AI Estimator](#) .
2. Contact your Account Executive (AE) or Customer Success Manager to get a quote for purchasing AI units. For more information, see [AI Units Purchase and Consumption](#).
3. In [SAP for Me](#) , open a service ticket under the component BPI-SIG-CA-AI to activate AI capabilities. Within the ticket, specify the premium AI capabilities you would like to activate. For more information, see [Reporting an Issue](#).

Results

Once the premium AI capabilities you requested are activated for your workspace, you can manage user access to them. For more information, see [Managing Access to AI Capabilities \[page 5\]](#).

1.1.3 Managing Access to AI Capabilities

As an administrator, you can manage access permissions to AI capabilities for your users.

Prerequisites

For base AI capabilities, ensure that you've accepted the AI terms and conditions before managing user access permissions. For more information, see [Base AI Capabilities \[page 4\]](#).

Note

The AI capabilities are disabled by default, even after you accept the AI terms. Users can view and use the capabilities only if they fulfill one of the following criteria:

- The users are a member of audience or user group for which the AI capabilities are enabled by you as an admin. For more information on audiences in SAP Signavio Process Collaboration Hub, see [About Audiences](#).
- The users are not a member of any audiences.

Context

Once you have access to base and/or premium AI features, you can manage user access permissions at the individual feature level through audience groups. To do that, follow these steps:

Procedure

1. At the bottom of the left-side panel, go to  ([Settings](#)).
2. In the left-side panel, under [System Settings](#), select [AI Services](#).
3. In the [Audience](#) section, choose the audience group to whom you wish to assign AI services.
4. Choose the AI capabilities you want to allocate to the audience you've selected.
5. Save your changes.

2 Provisioning for SAP Signavio Process Governance Suite Tasks

Prerequisites

- You have workspace administrator rights.
- You have the access and authorizations to start provisioning in SAP for Me. For more information, see [SAP for Me - Access and Authorizations](#).
- You have a license for SAP Signavio Process Governance.

Context

Provisioning is the one-time process of enabling and setting up key features.

Procedure

1. From the [SAP for Me home](#) page, choose [Systems & Provisioning](#) on the left side panel, then the [Provisioning](#) tab from the menu options.

The [SAP Systems](#) page displays a list of available systems for provisioning.

2. Navigate to your [connectivity add-on for SAP Signavio solutions](#) entry.
3. Choose [Start Provisioning](#).

The [Start New Provisioning Request](#) details window opens.

4. **Optional:** Check the [SAP Cloud Identity Services](#) details and select the desired system number and region if you have more than one region displayed.
5. Select an SAP Signavio System from the available options displayed in the window.
6. Confirm with [Submit](#).

A window opens confirming that the provisioning request has been submitted.

7. Choose [OK](#) and scroll down the [Systems & Provisioning](#) window to track the progress in the [Provisioning Status](#) section.

❗ Note

Successful provisioning results in a [Provided](#) status. If you do not receive confirmation of successful provisioning, select the status provided to link to troubleshooting instructions.

→ Tip

If you need additional assistance when provisioning, you can open a support case.

For more information, see [Reporting an Issue](#) in the *SAP Signavio Support Guide*.

Important Disclaimers and Legal Information

Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information.

About the icons:

- Links with the icon  : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
